Profile

Senior Frontend Engineer with 9+ years of experience building enterprise web applications in banking, aviation and energy. Experienced in TypeScript, JavaScript and modern component based frameworks including Angular and Vue.js. Strong background in scalable frontend architecture, performance optimisation, automated testing and CI/CD. Comfortable working in complex enterprise environments and quickly adopting new technologies.

Technical Skills

Frontend
TypeScript • JavaScript • HTML • CSS

Frameworks
Angular • Vue • RxJS • NgRx • GraphQL • REST APIs • Nx Monorepo

Testing
Unit (Jest • Jasmine) • E2E (Playwright • Cypress)

Tools
Git • GitHub • GitLab • Nx Monorepo • Docker • AWS • GitHub Actions

Practices
Agile/Scrum • CI/CD • Clean Architecture • Performance Optimisation

Key Achievements

- Delivered frontend systems serving up to 500K daily users (aviation domain)
- Led Angular platform rollout adopted by 25+ utility operators across Germany
- Implemented Playwright E2E tests for critical user journeys, reducing production issues
- Improved application performance and reduced load times through bundle optimisation, lazy loading, code splitting, caching and API optimisation

Professional Experience

Senior Frontend Developer
HCLTech, Amsterdam **July 2022 – May 2026**

Project: E.ON
- Led development of a large scale Angular platform for consumer grid workflows
- Enabled the onboarding of 25+ German DSOs by delivering scalable multilingual solutions
- Designed scalable frontend architecture using TypeScript and modern component based frameworks
- Introduced Playwright E2E testing to cover critical user flows and improve release confidence
- Collaborated with stakeholders and advised on frontend architecture and technical decisions
- Contributed to CI/CD improvements, enhancing build reliability and deployment efficiency

Software Engineer III
Ordina, Utrecht **May 2020 – June 2022**

Project: Rabobank
- Built an Angular-based insurance platform within a monorepo, integrated with core banking systems

- Developed complex nested reactive forms for financial workflows
- Increased unit test coverage from less than 60% to over 85%, improving code reliability

Project: Clockwork
- Developed a Vue.js application using TypeScript and Vuetify, integrated with REST APIs
- Contributed to backend services using Java and Spring Boot

IT Analyst
TCS, Amsterdam **Dec 2016 – Apr 2020**

Project: Air France-KLM
- Developed booking and check-in flows for platform serving up to 500K daily users
- Developed multilingual booking workflows supporting users across international markets
- Improved frontend performance and user experience across key journeys
- Acted as Release Coordinator and Security Scan Coordinator

Project: Cisco Systems
- Built CRM application from scratch using Angular and Java
- Delivered MVP within 6 months, accelerating time to market under tight deadlines

Project: Barclays
- Enhanced UI features and ensured cross-browser compatibility
- Implemented accessibility improvements aligned with WCAG standards

Education

Bachelor of Technology
Manipal Institute of Technology, India
2012 – 2016

Courses

- Angular - Front to Back (Brad Traversy)
- Advanced JavaScript (Andrei Neagoie)
- Understanding TypeScript (Maximilian Schwarzmüller)
- Java Masterclass (Tim Buchalka)
